

## IT supporter Scapegoat

scg5

Year: ~????

Inventor: xxxxx

Computers are highly complex, nobody understands really what a CPU does in detail. Also Operating systems are complex, if you would take an average Operating system you would have at least 5GB, 16GB would be 500'000 A4 Pages that would weigh 250kg, so if you multiply that with 5 one would easily find out that nobody could handle that. Therefore the companies invented "The IT Supporter". In the early days they got a lot of money, today no company. So if something goes wrong or even someone dies because the Scapegoat and even sentenced. If you add the complete content that is handled with a computer it are more Exabytes than Gigabytes. So definitely nobody can handle that. But of course the 20 Years old IT-Guy will be held responsible, even if he is the one with the smallest salary i had in 1999 at ABB Flexible Automation ZH Alstetten. And if you would tell what happens at such soft of companies they may even kill me. CIA/NSA would disable malware if the supporter analyzes the problem to keep the malware secret. Maybe even fast interacting Bot that eg interact with sexual integrity of equal aged women since CIA would "not attack women."

## Senior Hacker

hal1

Year: ~????

Inventor: xxxxx

Often the most gifted Hackers are owned by system like military or police or secret services, kept as slaves or hostages and forced to produce Cyber-weapons. Not only Hackers, also Scientists. But some of them can defend and it is not only Julian Assange. Those bad Military Systems begin quite early to find the most gifted kids (see Card dtz, Switzerland)

Like in the Movie Tron 1, he would be one of them that could help two younger people not break up, but unfortunately he would also know, that if they dont break up satan could not blackmail them with "Was her, 2?" so they would be in danger for the rest of their live. LMTOm First 1 3=3::Equal Aged 12:34567 First 1 1=1: First Forever liebe Aquila -4-raylickOBnro

## BaseCap-Hero

ma2

Year: ~????

Inventor: xxxxx

Like all archetypes think about the option that there are always good and bad people. (a14 card) so it could also have some angle archetypes that do bad things or that are beeing abused to do bad things. To derived the archetyp from a person from cloths, look or beauty leads often to wrong results, but if you talk to a person or if you really know a person it will be very hard for the CIA Neuralink Software is a Saint. They are getting better with the touring completeness to hide a persons real character and motivation, but since they use generic code, one single mistake well expose the truth, so listen carefully if they lose one archetype code you will find a lot of them and remember there are both sorts, good and bad (a14)

## Assassin

at1

Year: ~????

Inventor: ?????

Islamophobe "christianis" Terrorist. Run amok against 77 innocent young victims. As far as i could find out he was only sort of a "home child", "Street Child" where one can only speculate that he was formed to an assassin with eg. Technology Cards etc. His manifest was "symbol minded", so i guess that it was some sort of symbol language they used. Maybe combined with legal or illegal drugs; maybe only in the beginning to set the base stimulus-response-habits. If this hypothesis is true, then the people that planned to kill the 77 victims is still free and plans maybe the next assassination. And the chances to find evidence on his devices or the devices of his neighbours is quite small because those people would assassinate innocent people as a profession. Payne Epstein "customers" can be activated as terrorists or more likely that they would use younger people to do such things, eg m06 > m07 > m08 > m09 or at1

## Scapegoat

## Technology enthusiast

scg6

Year: ~????

Inventor: xxxxx

Since at least 1974 Hollywood shows technology enthusiasts as Terrorists, criminals... for example in the movie "Juggernaut" where the "Hacker" wants to blow up a passenger ship. So this mindset is in the heads of our 1960s Parents, except they are themselves technology enthusiasts. We guess that's one reason, why the older generation sees us 1980s that like technology and also like the "Hands On" from Hacker Etics as Criminals. But in fact they only project their sins upon us. It's populism since a technology enthusiast can maybe destroy the word but also save the world. If a 1950s Parent was 30 years the scapegoat he maybe would agree to give this role to a 1980s person, for not being the scapegoat anymore, but still having higher access codes than the 1980s and possibly much more sins that are beeing used to make the 1950s attack the 1980s scapegoat.

## Judge Archetype

ma5

Year: ~????

Inventor: xxxxx

The role of the judge is one of the most powerful in the system, in many movies shown as a "fat "cute" Santa Claus. The role / chess piece would be perfect for a mastermind of a military dictatorship. If the judge and the jury is controlled by technology cards the accused would not get a fair process and nobody would even find out who decided to kill the accused, even if he is innocent. Weakness would be the a15 card. It would also be perfect for a foreign aggressor, secret service to subdue the whole system. In "To protect and infect part 2" (12:17) @iotor says "Is not clear to me, that a judge would understand anything I just said", but that's wrong: that one does not use a15 card implies, that he knows, that the accused is innocent.

## Disinformation archetype

ma8

Year: ~????

Inventor: xxxxx

Since the Roswell-incident, the CIA not just started to cover illegal Human Experiments with Alien Stories, they also actively hunt those, who could be able to leak details about the abusive system. In this case "Man in Black" or "Enemy of State" (just outdated technology stuff so they gave it to the world and the Faraday Cage is not really a Faraday Cage...) greetings to Will Smith, bzw. the movies are cool for young boys except that detail.

Point No.1: No it is not sexism, the boy would be more stubborn

Point No. 2: Don't buy Assembler Books when your 14 Years old, see dt2 card

Point No. 3: Nor the girl would be on the dark side

## Voodoo-Lady™

g4

Year: ~????

Inventor: xxxxx

The Voodoo-Lady is the Role (maybe without even knowing it) that helps to obfuscate the technology-cards. Many people think magic works but don't believe in things like Stimoceiver, Active Denial System, ...

This archetype does not only appear in Monkey Island™ but also in "Plates of the Caribbean" or in the Series Bones "The Man in the Morgue" S1E19, but Bones picks in his eyes and says: "If you picked someone in his eyes, voodoo isn't that spooky anymore"
