

EZAK IMAK Hun in the Sun

Bomber Nach oben Nach unten

	Bomber	Nach oben	Nach unten
Hun-in-the-Sun	0.95	1	0
Jäger	Ezak-Imak		

Dieses Spiel besitzt offensichtlich keinen Sattelpunkt (wurum?), Wobei Jäger nach Bomber haben reine Strategien, die sich nicht durch den Gegner zu dessen Vorteil ausnutzen lassen, wenn dieser die Strategie im voraus erfaßt.

Inventor: **Satan**

<https://0x8.ch/HaekersCardgame21>

Year: ~1950

Algorithm: Ezak-Imak (Kami Kaze in reverse) VS Hun in the Sun

The Japanese Attacked the US Airforce most from the bottom up 95%, but sometimes from the top to bottom 5%, so the US Airforce had to watch both sides. Today mental institutions use the same algorithm for psychological warfare. 95% Patients are Victims, 5% are forced to run amok <https://www.springer.com/us/book/9783764353384>

Same Algorithm can also be used in Psychology, Politics ... for example 95% Slaves in Companies and 5% small hitters

Suicide Death BOT

Inventor: **xxxx**

Year: **????**

If a person can be controlled or at least influenced by some technology cards & evil people unfortunately could create some sort of a suicide death bot, using things like m38 card for priming to make innocent people to commit suicide (attempts). We think that this is the major reason eg. CIA kills people that know to much and the reason news are normally not telling the story from people that committed suicide (maybe they killed Jan Murdoch with a suicide death bot). People with lower rank would be told that it's just training or RDSM. But in fact if the Whistleblower would die the whole group would be lost too and so controllable by eg. the CIA, wrist case m37 & dt1 card. Those groups that already have "trained" a kid to death would never confess. Forced to keep silent. Possibly the code of such confessees death bots would be packed into proprietary non-deterministic crypto both personal or generic, eg. m38 would be generic. Was Jan Murdoch@Debian also a victim?

a26

They seem to stalk me 24h on my DBS / Neuralink.
As soon i find out relevant things they hunt me down. Autistics love to solve puzzles, solving one gives more information. This algorithm also seems to work with telemetry, one can carry about 5 things, while they can force me to try to carry 10 so that i get problems. They must give me relevant infos because the autistic brain would not accept irrelevant information(s). So maybe, paper and pen is my friend. Combined with a prosthetic implant, remote tourniquet syndrome, spinal cord attacks, Event trigger on things like triggering t46 card, Rawhammer Attack on the mind, chemotropes, blowing up my operating system, virtual intimidation (eg with guns), through older potentially people people (earlier attacks -> PTSD -> revictimizing), induced epilepsy (PAIN -> burns the scene in your mind)... **playing this card would imply that you just before found out something relevant**

Language Level Detection (nasty filter rule)

Their Antwort ist bedeutungslos. Wir wissen nichts. Wir registrieren, berechnen und ziehen unsere Schlussfolgerungen.

Inventor: **xxxxx**

Year: ~????

There are algorithms to find out about the language level of the person who wrote that text. For example if the text was written by a **second grade student** or by a **language professor**. It seems that satan took this algorithm and used it as filter algorithm that filters communication above a specific language level. For example for filtering communication over **t1** or **t12 card**. This would have effect that especially intelligent people would be handicapped in "unseen university" (Terry Pratchett) while the less educated people would have no problems to communicate with each other. Unsure if bug or feature (preventing m40 card). But in a fair world all or none should have that filter. But it definitely wastes our time and makes us **crazy** and **low self-esteem**...

DOP CLASS

<https://0x8.ch/HackersCardgame21>

Inventor: **Alan Kay**

The inventor of the programming language Smalltalk was the first who used objects in software development. It was maybe the first Programming Language that used **Object Oriented Programming**. Like Gutenberg could print complete books with letters templates one can create bigger things out of such objects. A Class is can be single part of a complete software product. Eg. in an addressbook Class you would have predefined fields for Name, Address, Phone Number... You can also have such templates in Psychology, Mechanic, Simplification / Standardisation through predefined templates makes things more efficient but people maybe **lose base skills** when using **JUST templates**

Year: ~1993

```
pop stack

ArrayList<endangeredKids>
ArrayList<GefahrInVerzug>

{
    ArrayList al = new ArrayList( a.length );
    for (int i = 0; i < a.length; i++)
        al.add (a[i]);
    return al;
}

// Useful until java 1.5 - ghuang
static public int[] toIntArray (ArrayList list)
{
    int[] result = new int[list.size()];
    for (int i = 0; i < list.size(); i++)
        result[i] = Number n = (Number) list.get(i);
}

https://0x8.ch/HackersCardgame21
```

Inventor: ~~xxxx~~ **Year:** ~?????

would imply that they endanger kids by their own to have instruments of power and to distract or force those police officers that did not sell their soul to satan not follow the traces that would send satan (\$Shrink, \$herFather,...) to prison. Unfortunately some of those kids die, m46.

Mittäterschaft Mord für Menschen wie IhrVater die diese Karte "gebrauchen".

Military Rank

Inventor: Satan / Romans? Year: ~-500

People tend to subjugate other people and making them "usable" for their own profit. Globally there are many of such systems that use things like dt1 card to enslave people. Right-Wing people seem to thrive in Military Systems. Maybe not even by their own will but they have had maybe dominant parents and learned that it is liked with less pain if they just do what the older person says. I myself was always rebel and began early to question things the older generation said. This way I went is possibly more painful since you must defend against the older generation and consider that the younger that help those olders and obey their order attack you from two sides. And it would not be fair to be mean to the younger.

QAM64 Modulation

<https://0x8.ch/HackersCardgame21>

Inventor: ????

Year: ????

With QAM64 Modulation (some sort of a complex plane) you could easily transmit binary data over a scalar in time. Brain would possibly even adapt by its own. I guess there are several such channels

- Position in Room (x,y,z)
- Positional Data of your body (plane projected to your body surface)
 - People you know or generic archetypes
 - ...
