

World Peace Game

<https://0x8.ch/HackersCardgame21>

Inventor: John Hunter **Year:** ~???

Brilliant didactical model to teach conflict solving strategies to children and adolescents. The goal of the game is world peace.

Limbic System Vulnerability

<https://0x8.ch/HackersCardgame21>

Inventor: Satan / Capitalism / Advertising Industry **Year:** ~???

Since we are genetically still over 90% identical to our ancestors that were driven by the limbic system (Neanderthals, Monkeys, RUST™-Bots) our brain is vulnerable eg. to fat food, sex, kids slides. This is used by advertising industry, but also "used" for imposing your will upon others. Michael Foucault: "Human body and the human disposition in terms of sexual desire" (Euphemism). A Sociopath does not care about the sexual integrity of others, his primary focus is to sell crap and he would also abuse the SSC BDSM card and ignore resulting consequences. ma38 -> c01 & t1 & b1
-> m32 -> a16 -> m37 -> dt1. For example take a folder with evidence for torture and add 50% BDSM-Porn Images to it and nobody will talk about the evidence.

"For All" for personality trait (math)

<https://0x8.ch/HackersCardgame21>

Inventor: XXXXX **Year:** ~???

People tend to generalize. Of course there are things that apply to all cases, mostly in maths. One problem people often do is to generalize personality traits. Personality traits are often normal distributed, this would mean that eg. 80% with that specific trait would fit into that specific group, but not 100%. So personality traits can't be used as proof or evidence in criminal cases. Also consider cards t21, a14, and that with "behavioral sciences" (= "white" Torture) people can be forced to do things they otherwise would not do. Even the V people ∈ "Human Race" could possibly be wrong because some could be aliens or reptilians.

Overload operators methods and symbols

<https://0x8.ch/HackersCardgame21>

Inventor: XXXXX **Year:** ~???

Overloading is possible in some programming languages. I use this as metaphor for one could also do with such a feature.

For example the above "WHY?" could mean:

I agree, I question everything even this "Question Everything". **But you it could also mean:**

Why should I care and question things, i want to become or stay an old fat hairy ugly ignorant pedophile person

In programming for example the calling function would decide what "stream" on gets over an technology card in real world you could implement that with RFID, HandyID, face recognition....

it's "your" own fault

<https://0x8.ch/HackersCardgame21>

Inventor: Satan **Year:** ~???

Tomorrow they possibly will force me to take anti psychotics. It's not medicine, it destroys your brain, your intellect, your soul. The older Generation kills you this way. So you will be "reborn" as stupid robot. They will again abuse you as scapegoat, and again you would have to pay the bill for what the parental generation did. So i wish, that all my tangible and intangible goods will be inaccessible (maths: transitive) for people that are older than the 1975 Generation. And that this Cardgame will be distributed to younger people that makes you search always the same places triggers multiple times, co2->a16 In my particular case they seem to have a fetish triggering that in private life, maybe they hope, i would not leak it them.. as you see, i would "not", and if you talk about that they even begin to render things on your sex toys, that sux even more

search detection

<https://0x8.ch/HackersCardgame21>

Inventor: XXXXXX **Year:** ~????

They seem to have some sort of function on Stimoclever, Neuralink to detect if you try to find something. That activates an eventtrigger that then samples the person you fear most (\$1940\$Shrink) say things like:
- Suchen bis gefunden (mil Rethorical Automatism)
- HAHAHA, i hold it in my hand (+video Sample)
- What does he want, HAHAHA
(additional b1 card is activated with the sample)
Especially annoying when they do it if you try to find your sex toys... prerequisite maybe m98 card, often plays loop that makes you search always the same places triggers multiple times, co2->a16 In my particular case they seem to have a fetish triggering that in private life, maybe they hope, i would not leak it them.. as you see, i would "not", and if you talk about that they even begin to render things on your sex toys, that sux even more

Hacker Ethics

<https://0x8.ch/HackersCardgame21>

Inventor: XXXXXX **Year:** ~????

* Access to computers—and anything which might teach you something about the way the world works—should be unlimited and total. Always yield to the Hands-On Imperative!

* All information should be free
* Mistrust authority—promote decentralization
* Hackers should be judged by their hacking, not criteria such as degrees, age, race, sex, or position
* You can create art and beauty on a computer
* Computers can change your life for the better

My Addon:
Prambel, Swiss Justice System kills innocent people

Prambel is a Swiss company that manufactures and distributes medical products. The company has been involved in several legal disputes, including a class action lawsuit filed by former employees who alleged that the company had violated labor laws. The company has denied the allegations and continues to operate. Swiss Justice System refers to a hypothetical system that would be used to identify and prosecute individuals who commit crimes against humanity. The system is not currently in existence.
