

## Optically discredit people

2009

m92  
Year: ~2019

Inventor: xxxxx

2009.

Full of hope "to change the civilisation into a better state"

2019. Shown as criminal or Rapist, signs of psychological Warfare

In my case they also did such things, for example the "anti psychotics" also made me look ugly and made me behave strange, so that the people stopped or even feared to talk with me (m41) and they also told my friends that I would have raped a girl, killed another friend, so they definitely tried to kick me out of the group of my equal aged friends that want to rape their own kids. Would destroy good situations with equal rights, because the kid that is being targeted would try to commit suicide and the other kids would disconnect to protect themselves. So they isolate kids for cod, m4, m32, m44, mos2, mos3 mos4, atl (other kids would get dt1 card), unknown: we must patch that somehow.

## Voice Delay + overlay different person

m81  
Year: ~2019

Inventor: xxxxx

I guess there is some software on the communication systems, that can identify common sentences a person says within less than 1 second and then plays the same sentence your equal aged friend would like to say to you with the voice of an old pedophile person. If the Aversion Archetype even cybernetized the young person this would revictimize him or her, maybe even making her doing a suicide attempt.

The people doing this listen days or weeks until they have some sort of a touring complete avatar (NSA/CIA Detainment?) for voice, then it is maybe automated until the victim is dead. Maybe also in context with pedophile people that want to rape their own kids. Would destroy good situations with equal rights, because the kid that is being targeted would try to commit suicide and the other kids would disconnect to protect themselves. So they isolate kids for cod, m4, m32, m44, mos2, mos3 mos4, atl (other kids would get dt1 card), unknown: we must patch that somehow.

## LHRH-Agonist GnRH modulator

m153

Inventor: xxxxx

In case I would have found out, that they used her to make me controllable with my love to her and I would write a mail that this situation is the way the induce suicide they would "maybe" tell the direct opposite, and that I would have raped her. People would maybe not believe it, so they chemically castrate me. That the do drug tests on psychiatric patients is quite normal in Switzerland as you can read in the press.

To chemically castrate the victim, would be suggestive and manipulative and would give the criminal following benefits.

- It would suggest that the victim is drive control criminal  
-> no sex would maybe not be a reason to commit suicide  
- it would be a mean chess move Below the belt,  
-> Victim-hashing would maybe cause another suicide attempt  
- it would make the jury focus on the sexual things instead of the 18 years the victim was abused as slave driven by his love not by his sexual needs. It's about truth, trust and the promise both gave. Maybe this is a normal way to drive rape victims in Switzerland into suicide, not sure so far about that..

## "fair" "Game"

m146  
Year: ~?????

Inventor: Satan

They always tell you: "it's a fair game", but in fact it is not. I worked ~20 Years in the first market (Swiss terminal) for working in non-disabled market). The average wage in Switzerland is 65'910\$. So I should have about 1Mio \$. In fact I have goods in the worth 30.000. I payed about twice the value of my 1.5 Room Apartment I lived in for 15 Years. After they took the money, they activated the caretaker that lived 10 years less there that attacked me and then told the homeowner, that I would have attacked him. The police brought me to the Mental Institution Konigsfelden in handcuffs, so I had no chance to go to court, then they told me, it's all >> your own fault << you passed the deadline. The finishing move of the CIA will be to kill me to blackmail all that took my goods and to blackmail them the rest of their live, and of course this is also all my fault

## Base Emotion detection

m175  
Year: ~?????

Inventor: Satan / Capitalism / Advertising Industry

- fear  
- faith  
- love  
- shame  
- hornyness  
- ...

Like a plush: to hug, pet and care for but more interactive.

Clinical use: as a coping strategy, e.g. you can buy a shy cat for a scared child, which then helps the child to analyze his fears without focussing directly on his own fears, that then might would lead to a cognitive dissonance & avoidance behavior instead of analyzing the things that caused the fear

As an ally but unfortunately also by some to mistreat (Anonymous => Case Dusty; where I would expect, that Kenny "learned" violence eg. from his father, so in worst case Kenny is a victim too, and if Anonymous would have beaten the shit out of him then someone maybe wants to play a dt1 card to the whole anonymous crew, unsure so far)

## Bot / Aversion Archetype

Inventor: xxxxx

One can produce situations, where people are played off against each other. You could do this with drugs for example giving one person chemicals that make happy and funny and the other person chemicals that make sad. Worst case both victims will begin to fight each other while both victims think that he or she does the right thing. Maybe such chemicals were involved in Stanford prison experiment, unsure. But with technology cards (eg. t1...) you could possibly produce similar situations. Or in Politics, race, gender, Nazi => jews... or with just showing good or bad Facebook content (facebook experiment, see Internet). For example also to tell some people that the accused younger boy is guilty and therefore would be "legitimate" that an older person takes his goods would create the same situation, the unjust decision is often in favour of the stronger like SherrFather that has weapons... NOTICE UNSEEN THROT.

## You ARE not INSANE

N. Lat.: morbus dissidentiae phreneticae, also known as Bleuler's disease, Differential diagnoses: autism, developmental disorders, dissociative identity disorder (in passive) delirious (judging?) Depression, injuries, tumors in the brain, various forms of dementia, confusion, disorientation, psychotic states, Borderline Personality Disorder, random personality disorder, compulsive thoughts, pernicious anemia, induced disorder #MKULTRA.

Marc found strange behavior in the LAN in Altstetten (ABB,1999). he guessed this must be CIA footprinting / enumeration for world domination. They attack the 20 Years old Marc with illegal drugs declared him schizophrenic/discriminate / discredit / isolate / planning / calling him a rapist. They did experiments with him to force him to commit suicide, but that's not marcs fault
