

confessional (to confess)

We guess that the NSA/CIA works with the principle of seduction. He gives the people the opportunity to get money if they sell their soul or, if they sell their soul just a little bit. With **BigData** and 100 Years of DataRetention **they would know about the smallest sin**. Thy used m66 Card as Scapegoat.

One working hack to work around this principle is to **confess** what you have done. Me for example I drove drunken car and did other things, so tried to turn myself in, but they said that this sins were expired. From that point in time the NSA/CIA System could blackmail me with this sins anymore, unfortunately they then began to shoot against my sexual integrity.

Consumer Note: **Nun not included in all use cases.**

induced and committed suicide

Inventor: ~~Satan~~ **Year:** ~???

Often the offenders say that they would attack me with weapons or things like a16 card. I guess they drove Tobias Moser to commit suicide with his weapon from the Army. I guess they first told the group that he was cyber-raping girls, the group agreed to kill him (m37 card). They did not ask me, but I would not have agreed. They also know that all those people that said no to kill him would later ask questions. Generic, later they asked me to agree to Kill Ruedi, I disagreed. My answer is "not in **our name**" AND "**es gilt die Unschuldsvermutung**", since I say this about 100 times every day I guess they would like to make me a killer too. **If played after m37 card this card is abused for confess prevention and mindcontrol key for the complete group.**

Some Dominik Z says: "Pedophilia can not be therapiert", i don't know if they mean because of the m72 card or if it is already to late to show them how to behave correctly. If older people gets paranoid when I tell them (even non verbally) that **they behave do and they are pedo** they **would become aggressive and attack me**. If the young person that would complain about such behavior and **the child is not alone** they would begin with dirtier things (eg. use m41 & m37 or m38 yards...) Normally they use kids in the same age like their victim as scapegoats (\$stups!girl), would then put the scapegoat into a mental institution and stop abusing the victim. If the victim would think they mentally erased the real offender in the mental **Pedophilia -> Obfuscation** the **m73 card to keep the people people pedophile and therefore d(in)theCase and attacking younger people that would want to stop (cyber)pedophilia.**

Commit suicide Jump now

Inventor: ~~xxxxx~~ **Year:** ~???

On my balcony there seems to be an eventtrigger that is shown on something like Stimreceiver or Neuralink: "Jump Now". To prime they run things like JusPrimaetNoctis (m38) and activate the Active Denial System (t15) or trigger my amygdala implant (b1). I often tried, but I had luck so far, I not yet jumped, but almost. They seem to train this habit with cards t2, t1, t7, a16, m32, m44.. one could knwo when to start this algorithm with just positional data (eg GPS, m60). If victim has body telemetry (2 RFID Chips or 2 resonant circuit in the head/skull or retina CCD (a19), they could even calculate what the victim is currently looking at to trigger this event added to this algorithm. If i have a spinalcord implant (t6) maybe this prevented my death, but if this would be hacked i could not even prevent my death.

CIA
These Cold War-era intrusion detectors were designed to blend with the terrain. They can detect movement up to 300 meters away are powered by tiny power cells, and have built-in antennae. Transmitters relay data from the device via coded impulses.

The CIA seems to put disgusting (igitttt) Pictures on relevant informations (Cold War-era Intrusion detectors...). This normally leads to avoidance to inform yourself about what they inform the people who know and abuse this dirty trick.

And it would be likely that eg in the picture, in the EXIF Data or in a system where only agents have access would be less disgusting content but more informations.

There seems to be some spell or socio psychology design pattern to prevent people from distributing informations(s). It samples the same as my own touring complete avatar tries to tell other people, then their touring complete avatars loop {
I know this information already proof 1 that I know already
proof 2 that I know already
I know that I know already
proof 3 that I know already }

After a traumatic event like death of someone in family or after a rape (or just m38 card) people often show the behavior of "self injury". And if someone does self injury they can put him into a mental institution. In the mental institution he or she gets tons of "antipsychotics" that make stupid, lazy. If the victim is **whistleblower** or **whitehat hacker** that tries to show the public things that go wrong to fix those things putting the whistleblower in a mental institution would be **great** for the **offender**. Maybe they tell even play m41 card to make the group think the self injury is because of them, finally playing the dt1 to blackmail and silence the whole group. **Workaround:** just have plastic knives in your household. **There are victims that suffer much more (below my image)** than i, if you know her; have a good hart and are medically gifted **AND** about the same age please help her.

Drone Kills: killing with drones or NPC's or people one can boss around leads to ignorance.
