

## Locked Notes

m78

Inventor: xxxxx

Year: ~????

They can lock notes you made. They know maybe about the notes because eye1 card. Algorithm would be something like:

- Neighbour knobs on wall & at the same time pain in the eg. in the chest implant is activated.
- induced rage card. eg. if you use electronic device - loop recorder { do something else }
- loop recorder { begin with the first, no the second ... } (a7 card)
- pain frontal lobe enables

- go through all router cards in browser!!!! (a17 card)
- drink something / eat something / smoke (smoke1 card)
- > so maybe it would make sense to work on the notes....

## maximum profit AlgoRithm

PsyOP

https://0x8.ch/HackersCardgame21

Inventor: xxxxx

Year: ~????

The old generation seems to have some sort of Algorithm that calculates the maximal profit of an action they force to do a Victim. For Example if the victim (V) would make a graffiti to tag an offender as Rapist or Murderer they would make let him do that, but they would record that scene, then judge (01) would start a criminal case, making profit with the law system. The owner of the building (02) would get money for damage the victim (V) did, the painter (03) that redraws the wall in white would get money for that job... An additional "feature" of such an algorithm would be that in the end the Victim would be sentenced, shown in media as criminal, nobody would believe him and nobody would talk about the equal aged kid that was raped or murdered, so the real rapist (04) from the old generation and the person that has access to this algorithm (PsyOP) would be the main problem. unknown: Weeks and discredits the victim that knows about the rape or the murderer intentionally?

## 3D model of victims body

m99

Inventor: xxxxx

Year: ~????

Like the m98 Card they seem to have also a 3D model of my body, most likely generated from a RetinaCCD (eye1) and they also add eventtriggers (t14) that then eg activates electronic psychological warfare, eg chains like c06 => m32 => m94 => m44 => m93. Not yet found out how to workaround that problem, i will update this card when i found out, and maybe make some videos to explain.

This card seems to have several DEFCON Level

If i say: "\$Shrink now asked his mummy for help" the algorithm gets more worse, additionally it seems that the System or Project Paperclip then gives out more informations about the complete domin model of the alledged infiltration of switzerland, maybe to obfuscate the 1940s neurology classes? \*Chemirode gesicht\* \*cd10-f44x\*

## Pre Ordered physical Violence and Blaming the Victim

m162

Inventor: xxxxx

Year: ~????

After some good howers of work they play the phsical violence card (Euphemism). The violence is already entered in the mainframe. Even if you are strong enough not to wish you revenge as the loop wants to make you, you though need your AutisticHelmet.

Thing in question Psychological Effect:

- on victim? Maybe obfuscates remote ECT?
- on followers?
- prevent victim from finishing his TODOS?

## Touring Complete Avatars to spam Justice System

https://0x8.ch/HackersCardgame21

Inventor: xxxxx

Year: ~????

They can tour complete avatars from Police Officers, judges, Victims to Spam and obfuscate the investigation against him. \*m42\*. The NSACIA "maybe" even infiltrated eg swiss police communication systems like polycam. All countries should have an eye on such important systems, since they would be main target for NSA/CIA. So definitely a SIGINT/COMINT Problem, so he tries to drive Whistleblowers / Whitehat Hackers / witnesses to things like m32, m44... to distract from COMINT/SIGINT problems. Maybe even a default TURBINE, TARNIOL, QuantumInsects Polycam Module. \$1940Shrink blows things up to distract from the main problem (COMINT/SIGINT) we know about thanks to Snowden • Level 2 of this algorithm is that those avatars are being activated only if the Whistleblower, Whitehat, Witness says something. So lets talk as a chosen plaintext attack - The speech part that imitates voices could be some neuronal network. t+Honeyport? youtube data?

## love detection (between equal aged)

https://0x8.ch/HackersCardgame21

Inventor: xxxxx

Year: ~????

Somehow they can detect when equal aged kids tell each other that they love each other. Natural Language Processing AI? AI?

in my case normally pedophile people that destroys everything or even begin to swear or threaten us.

- unsure if jealousy
- drunken sadistic
- to make kids consume stuff they dont need
- to make slaves out of the kids with promising to put them back in their group of equal aged
- ???

## Twin Towers

https://0x8.ch/HackersCardgame21

Inventor: xxxxx

Year: ~????

I guess a lot people knew that the twin towers will fall. In my opinion very likely that the people from CIA knew. If you look at m95 the "war on terror" would have obfuscated perfectly that the CIA began to undermine Switzerland since 1999 or even since 1968. This two Rastai ARTWORK Collection glasses i got from \$1955MarketingGuy @ ABB Flexible Automation AG, ZH Altstetten in the year 2000. When he gave them to me as a gift he said something like: "This Glasses will be precious in the near future". With just a bit of imagination one could the two glasses that were in a nice blue cardboard as the twin-towers with the holes from the airplanes. When i Asked SherMother / SherMother there was a time when i trusted them) in 2002 what they think about my theory. They said "no, no of course nobody knew about that the twin-towers will fall". What they said seemed to me like a very cheap lie. As soon as one began to question the official version people began to discredit or even attack.

## Cuddly TOYS FIXATION

https://0x8.ch/HackersCardgame21

Inventor: Franz Steiff / Steiff GmbH

-1900

To hug, to cuddle, clinical use e.g. in the case of children that have been sexually abused to recognize (object fixation on the plush / coping clinging to the plush") when the victim is overstrained with the examination => pause!

Multifunctional hug, to throw at the head of other people, coping strategy of kids if parents don't care enough about the children, or as a present to show solidarity: SK1 card Problem.
