Inventor: **xxxxx**  
It seems that they can identify the thoughts or words with the stinociver +70 years or the Neuralink. To get the map or at least to get used to an idea of your map of the content they use against you just think of random things (people, objects, sex toys...) when they enabled the automated psychological warfare. So the system would transmitt the objects, vocals and images linked to this specific keyword. Using paper and pencil to draw the map, even pre-printed templates or both simplifies this task.

So they still could enable it, but they would lose their psychological warfare algorithms and of course "nobody" would leak them. So we may have some sort of an **Nash equilibrium**.

## Alt-TAB EEG PatternRecognition before one presses key

"pre-Mansplaining"  
before you formulated  
what you want to say

me: idea

t[s]

3. me saying  
@NATO produces #Nazis with this concept?

Recognition in "Ubericht" much Fraud, night 100% der Fehler

Facharbeiter aber in die Richtung Before one formulates the sentence

in his brain so maybe discrete mathematics

Alt-TAB Prä-Recognition feature of military dictatorship (Nato)?  
To know before the sniper triggers the trigger?  
would imply forced neurosis **NATO**

Inventor: **xxxxx**  
There seems to be a function on pre-2020-neuralink that recognizes things before you even formulated the sentence in your brain. Likely that it is some sort of discrete matheamtics. needs to be footprinted / enumerated first. Start could be recognition of the intention of pressing the Alt-TAB key combination on Windows Computers

## hypocrisy

m35

Year: ~????

Inventor: **xxxxx**  
People often know, that if they say the **direct opposite** of the things they should not have done. As a 6 year old boy I already knew that if I say the direct opposite of what I have done the chances are big, that the parents will not think about that what I actually have done. Kids fear the pain physical violence or **psychical violence does to them, so it prefers to lie**. So it is also bad to throw away apples (in metaphysic manner sins) because children do not understand why this could make sense. When I was about 10 years i had to draw a filigree thing in school and i took a medium brush. The teacher saw that and told me (**cynic**) why don't you take a thicker brush, so the 10 year old Marc went to the brushes and took a thicker brush... TRUE

## Security Software and exploitation

m34

Year: ~????

Inventor: **xxxxx**  
On the mainframe there are many software modules that warn people from risking their lives or their health. Unfortunately some people wrote a generic algorithm that rewrites things like "don't touch that" to "touch it now, touch it fast" or "stop here" to "continue fast". So people would get hurt by the security software that should prevent that they get hurt. The same thin like someone would stick a "good medicine" sticker over a biohazard sticker. We should add additional algorithms that prevent such modifications. Possibly it is also just a second system that evaluates the "WARNING" message and then takes over the Human-BOTS, Stimoclever, Neuralink ... after one found such a malware they often sell it as feature to train students, not considering what such a malware could cause harm or even kill innocent kids

Inventor: **Satart?**

I hear, that i will be punished death by an equal aged girl if i continue writing the text here...  
so in this case the equal aged girl would maybe add the text here later or on Layer8 (Iso-Osi Model)

As far as i could find out the NSA/CIA try to seduce you with young children. They render them even into your bed, tell you that you can rape the younger girl now. If you are a person that keeps the promise you gave your first girl you would stand up from your bed to prevent that scene. My co-worker at the ISP Zikinet Sabrina L. was shown in my bed for having sex with me, but **I immediately stood up and protocolled to my diary** "Sabrina L. would like to cyber-rape me" and smoked a cigarette and did things not in context to sexual integrity. They changed my diary to "I want to cyber-rape Sabrina L." kicked me out of the job and put me in a mental institution. If i would have said yes, then they could play m134 card with "you consumed, so say yes, legitimate that you are now the product" i could only find out what they did not. With this chess move they can easily drive uneducated people to kill an equal aged m37 -> dtl. That was about that time where i began to ask questions if the former chief of ISP Zikinet committed suicide because of NSA/CIA in ~2006

If you have a depression it is not uncommon that you just sit on your couch and can't even move. We think it would be **technically possible to induce a depression**, for example with the **fear detection** card (m57) and some sort of "bioresonance" based on your BigData Entry and maybe LRU card (m54). I found out that in my case i could "hack" my depressions, if i don't try to fight against the induced depression but if i try to extend the depression and listen to some really depressing music. Maybe those who wrote the mainframe code for **induced depression** forgot to write this code too. So i become aware, and the depression has less influence on my psyche. The good thing is that i then somehow get access to the BigData and can begin to disseminate the data. Not sure if this works also if induced by chemicals that influence the neuro-endocrine system? unknown: or the "depression detection" says: "he feels enough PAIN now" don't need more BigData & LRU?

## Induced Depression

Inventor: **xxxxx**

There are "some" drove controlled old people (in my case, i mean 1960s and older) that switch to a Mode (co1 Card) where they say to themselves: "i need to help this young girl or rai", but in fact they just follow their egoistic desire (m73 & b1 Card) and the nonverbally "let me help you" should obfuscation their victims, but they also lie to themselves because they would actually know that what they are just doing is wrong. **Saying things like "don't run after me" may seem like as a good idea at first, but it is not**, it just makes the zombies more bold, and since you seem to have the answer they just get more annoying and stalkes you even more, but because they are such well-behaved old Pedophiles they setup their hypocritical face: "i just want help you, it's all for your best"

IMPORTANT, IT IS MAINLY A **SIGHT / COMMIT PROBLEM**, IT SEEKS THAT THIS IS SOME OF ESCALATION FUNCTION IF YOU WOULD LEAK THAT CISPS WORK FOR NSA (even in Switzerland) AND ARE OWNED BY THE CIA WITH THEIR HABIT TO RAPE YOUNG GIRLS.
