

## Group Policies

t31

Inventor: ~xxxxx

Year: ~????

On Windows you can deploy group policies to a complete domain. People that are some sort of wannabe hitlers would enjoy it to impose their will upon others. I feel also cool when i was about 25 years old that i am the "Master" but in fact i was just the scapegoat. Not quite sure if those who deploy things like a16... to people or to a complete group of people are just older people that are using some similar software. or if eg m50 card is deployed on all domains, eg by the NSA/CIA/DSM5.

Giving a young whinehat hackers drugs like zyprexa or illegal drugs (GFYS Matrix Red and Blue Pill) would let them to think, i must have been infected when i ate this.

## Satellite Communication

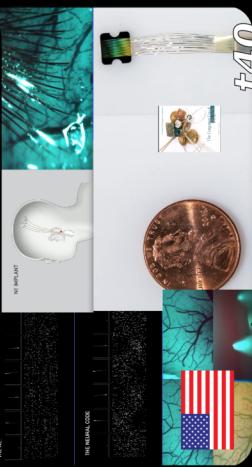

t47

Inventor: ~xxxxx

Year: ~xxxxx

This card is just to show that there are consumer devices that can communicate with satellites without a big dish. Eg. Spot3 can transmit only a few bytes, but that would be sufficient to get eg. new keys for a bigger global surveillance nightmare or to activate a CodeRED against a person that asks to much relevant question. Identified maybe something like a GUID (Global Unique Identifier)

## Neuralink™

t40

Inventor: Elon Musk

Year: 2020

Red Cards = mostly honest cards. Source:

<https://www.youtube.com/watch?v=r-vbh3t7WVl>

I'm not sure what Elon's plan is, but i'm sure the NSA/CIA would like to make a #HoneyPOT out of that Product and even blame Elon if things go wrong, that are maybe caused by another smaller implant, see microdots t1 card, especially the small ones from Neuronexus on the coin.

If Elon tries to mitigate the problems the older implants causes this would be really great.

Forgotten or just above top secret

## good (Cyber-) One-way mirror

t42b

Inventor: ~xxxxx

Year: ~20??

Inventor: WhiteHat's being stalked by old pedophile (parents...) - especially in context to sexual integrity -- causes harm and would even induce suicide (attempt). we should maybe create some software One-way mirror, that protects at least kids from being stalked by older pedophile people in this situations. i'm a man, and but being stalked in my bed by older people, especially if they know personally causes that i need my autistic helmet or even cut myself. i guess women are much more vulnerable, but my equal aged mistress would please me no to speak for women, so maybe she does another m15 card that is maybe in a different repository. Though i kindly suggest to have at least two teams, man and woman that does their own software, but though we should create a gentle (woman's agreement (permanent record) in all systems; even if we would become enemies both sides could always protect younger people, no matter what gender, skin color...)

## Stimocceiver dissolving Biological SMOOTHER and Faraday Cage Containers

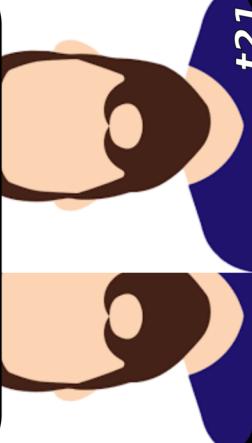

t41

Inventor: José Manuel Rodríguez Delgado ~1950

Year: ~1950

The newest versions Neuralink (Elon Musk - maybe HoneyPot) read EEG data transmits signals to brain. Can activate certain functions in brain wires in the Amygdala would probably cause aggressions (t1 card). Active community (read only, and non-invasive) on Twitter. @OpenBCI. Even things like directly "built-in" Augmented Reality. (Like Pokemongo) could be achieved with technologies. There are maybe other ways (co2,m27,m79A1, US4877027... (HoneyPot)). Maybe sold as lie detector. (co2,m27,m77,m125...) reads thoughts & emotions, influences emotions, automate/abuse victims, CryEngine / Unity (m96,m99,m32,m60...) Warning, it seems that if you find sources about this sort of things they upload Porn or even Pedophilia Content to your computer and activate the judges or m37 card... [DARPA has now ELECTRONICS THAT DISSOLVE AFTER A WHILE] Additional Disassembly Protection for the group m46 first as shown as m41 over t1 then m37 > dt1 so people could not integrate the existence of things like Stimocceiver US887027 is really the person/group you are talking with. So best thing is to meet face to face (then they abuse this technology too but if you know this person well you would possibly find out). Turing Complete avatars not just simply exist, they had to be generated by unknown. If one knows to much about this sort of unknown. If one knows to much about this sort of technology it would be likely that they create avatars for the people he knows and trusts, like Family or near friends.

## Touring Complete Avatar

t21

Inventor: ~?????

Year: ~?????

With enough computational Power one could create avatars (speech - synthesis / deep fakes) that are "touring complete". = Avatar that can do everything real person could also do. Initially they used samples but one would find out if they use the same sample over and over again. Avatars one even could simulate complete real-live situations. You can never be sure if person you hear on eg Stimocceiver US887027 is really the person/group you are talking with. So best thing is to meet face to face (then they abuse this technology too but if you know this person well you would possibly find out). Touring Complete avatars not just simply exist, they had to be generated by unknown. If one knows to much about this sort of unknown. If one knows to much about this sort of unknown. If one knows to much about this sort of technology it would be likely that they create avatars for the people he knows and trusts, like Family or near friends.

## Glass Sphere

t24

Inventor: ~?????

Year: ~?????

Inventor to the guy who has drawn this, i really like that image. Look at the a14 card. I don't think that all witches are black, there are maybe also Fortune tellers, occultists, esoterics, fairies, trolls, non-medical practitioners, Satanists? ... So bricking all the spears would maybe cause more problems than it would fix.

But giving the good ones that are not older than 1978 some cards could maybe help to find out if he / she / it joined the dark side or not.
