CARNIVORE (software)

~1997
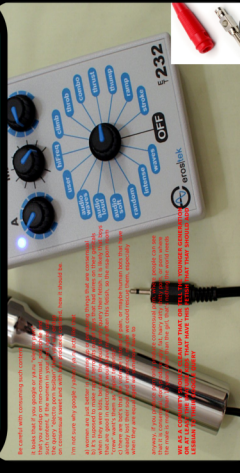

Inventor: FBI

Global Mailserver Survillance Software.

The public people was informed about Carnivore and then "suddenly" all people forgot about that thing. So maybe those things are deleted while you are dreaming / sleeping (cards t1, t10, t12, m116, m117...) as a global default process for all people

If it would be a default process, one could maybe find out, what they are trying to delete and focus more on that things.

With Vectors and Matrices you can calculate Networks. For example this image is from an app that is not allowed anymore on facebook. It could extrapolate all my social groups in Aarau i was part of: Primary School Küttigen (color 1), Bezirksschule Aarau (color 2), Boy & Girl Scouts Aarau (color 3), University of Applied Sciences (FHA) where i studied (color 4). And this information was generated only from the interconnections (metadata) between the elements (see a12 card) not even from the things people posted. If you would add Natural Language Processing (see a20 Card) and eg. some sort of Mayer-Briggs or Big5 Psychology test, you could generate quite good personalized Suicide Death Bots :((see card a16), counter measure, warn the people that some criminal people/agents did and do such things to me and are doing such thigns also to other young people.

I did not really knew, that swiss army has a fiber network, i heard that but it was just something i heard. In 2013 the Schulkommandant of Waffenplatz Wangen materialized at Schachenallee where i had a job at PrimeVision AG. I normlly went outside to smoke a cigaret (smoke1 card). I begun to talk with him and i used some sort of Social Engineering: I asked "What are the fiber networks of the army used for" (i did not knew that they really exist) then he just made two mistakes in one sentece: "They are used for the Marschbefehle". First he told me: "Yes there are army fiber Networks in switzerland" second he does not seem to be a gifted liar: "Marschbefehle are more or less small Word documents... maybe they use it for something else... i again ended up in m19.

Some sort of Firewall to prevent people from thinking about their brainchip. Sinners are kicked with their sins, for all people that are not sinners there is some sort of statemachine (co1 Card) that tries to obfuscate the people.

There are several (most not working) methods how they try to delete information in the brains of WhiteHats / Whistleblowers, rape victims.... c1, c2, a16, dt1, m22, m27, m41, m44, ma5, m15, t10, co4, m42. but definitley m19. Maybe deleting the scenes of a rape situation would help the victim, maybe. Think of the drawing as a visual representation (map) of the your brain and the purple part is what they want to overwrite.
Unfortunately brain is not two dimensional, so this would maybe work for a while but, and "anti"psychotics would "help" to keep the victim silent, but in the end nothing is really deleted and just reduces the intelligence. That's where the 1960s People have great long-term job opportunities in the surviallance business payed by the perpetrator. but after a while this "maybe" fails too.... https://marclandolt.ch/ml_buzzernet/2015/08/15/visuelle-represantation-einer-seelegeistespsyche/

eStim

When i was an about 10 year old boy "my voices" (t1, t10, t12... Card) told me to put wires to my genitals. In 1999 this programmed stimulus-resonse habit was often used by people at ABB Flexiblen Automation AG to dissociate me and to make me work faster or make me look guilty. I dont know if these people knew that this specific stimulus or something else like "Marc jr. dissociates because he raped a girl" even when i never had sex until then. In 2010 i was forced to tell my shrink ($1940sShrink) what "I" have done. He seemed to ignore that completely, did he knew about that? Then i was accused for being a terrorist and been put again in the Mental Institution Königsfelden. Was that the reason why they played the (m41 Card with Sahra?) I also question the circumstance that in german it is called "Bananen-Stecker". Obfuscates Technology Cards. This happened after i got my first computer (c64) in the age of 6 years, so maybe this is a psychological-backdoor?

Piracy & Relicensing

The Pirate Bay

Inventor: xxxxx

As a kid I pirated lot of Software / Music / Movies. So they blackmailed me with that sin until i relicensed everything. As far as i knew i relicensed "Monkey Island 1" and/or Doom1 about three times. After they could not blackmail me anymore with piracy they begun to blackmail me with things that go against my sexual integrity or they used scenes like "you've just been poisoned" or "you've just been raped under hypnosis" after all i should not have relicensed all, because you maybe feel bad about things you "stole" or copied, but the other things drove me into hundreds of suicide attempts. Additionally if you have proof for real crime or even murderer and the accused would use this NSA/CIA dataset to blackmail you, as long as you dissociate because of your piracy sins he will dissociate you but not kill you, unfortunately relicensed almost everything. But one good thing in relicensing things you pirated eg with 6 Years is, that the records maybe help to remember childhood scenes.
