Hackers-Cardgame is just a problem of the rich-mans-world. I spent 500'000 $ to defend me against the attacks of $herFather, $herOnkel, $herMother and $1940sShrink. Imagin how many people i could have helped in the third world or in slums with this amount of money that was wasted to defend myself. So maybe this HackersCardgame help others that they dont need to go the same way. Even i needed the money eg for co4 card, i though could spend a few tousend $ for charitys. One should not force people to spend for charities and NGO's, but if you have enough money, why not helping the poorest people on the world, And i bet many of such slums are subject to illegal human experiments. forced marriage Operating System `mos5`

Some military people their power to force a woman into mariage. Weapons room for lazy people. Those who create those systems try to make as less mistakes as possible, so that the members don't have to much cognitive dissonances otherwise they would start to think by their own. But the creator adds backdoors and triggers to the dogma room, so he can control and trigger its members. Weapons Systems not only Guns or Tanks, also having access to eg. Financial Systems, doctors degree, psychiatris degree destroy the live or hunt down eg the brother of the women he wants to rape. In Switzerland parmacy industry did drug experiments with Verdingkinder (Children without Parents) So far not public known is that they also tested things like Stimoceiver or Neuralink. Today all people in Switzerland seem to have such interfaces. Therefor there must be a backbone and we guess that this would be the Military Fiber Backbone. When i asked the Schulkommandant of Waffenplatz Wangen: "What is the military fiber backbone for" (i was not sure that there is one, social engeneering) he said only "for marching orders only"... Some Militaries intentionally let their soldiers force woman into marriage, if they do this with secret technology the military can easily force them to defend this secret, otherwise her women could prove that she was forced to marry the soldier, so they let the soldiers intentionally abuse it. If female Victims would not get support from the justice system, they would try to destroy the military and the justice. Even by abusing their or other kids as Scapegoats and weapons and would kill 2 Kids. "The Tower"; Forced red team?

If the agencies like NSA/CIA are only 5 Years ahead of the consumer market, they can easily hide unseen Transport Streams in the higher frequencies, here BINS (xDSL) but also in DVB-x or in Docsis.

Nazi Mental Operating System `mos3`

Mental Operating System would be a almost coherent dogma room for lazy people. Those who create those systems try to make as less mistakes as possible, so that the members don't have to much cognitive dissonances otherwise they would start to think by their own. But the creator adds backdoors and triggers to the dogma room, so he can control and trigger its members. There are antagonizing dogma rooms, eg. the Nazi the Jewish Science Mental Operating System, they would maybe be incampatible (m50 card). In my opinion the Jewish Science MOS has less bugs, but people with low intelligence would have less ambiguity tolerance. To show the Nazis where they have bugs could help to improve the situation. But to disassemble and and uninstall a complete MOS takes a lot of effort. If you find a younger Nazi that is on the wrong way but has not yet killed it wouldn't be ok to put him into jail, the only morally intact thing would be to help him / her that (s)he does not makes to much stupid things. I guess Nazis are victims of parental abuse to install mos3 to use them as a Human-BOT.

Electronics Book for Kids, Verlag: Stuttgart Frech, 1977. Warning, if the kid bought or recievied this book in the age of 10 it would be very likely that someone else wants to use him as scapegoat, and maybe the father of this kid is just the second scapegoat.

But it is my bad, that i spied on equal aged girls in scout camp, it worked but poorly

Exactly what one should do in front of an Apple shop. Great street-art and if you do it with blackboard chalk it would not even be damage foreign property.

I guess the person who did this would love if we dont know his name, since pissing off a 1 Trillion $ Company would maybe cause some problems.

If you are the creator of this work, let me or us say that it is really great and we would love if you would give us a license for this picture because we would like to conserve this picture for the following generations

AX.25 would be the simplest way for digital communication over random frequencies. Expect that they have tons of such technolgoies. Never play Red Team, except you really really know what you are doing. Just listening to transmissions possibly causes less harm then eg. "portscanning". Worst case satan even (ab)uses the lives of innocent kids as fence to protect its systems against hacking attacks. If you would kill a kid by a portscan then they own you because then you are a murderer too!!!

Inventor: Greta? ♥

This is not yet implemented, but we should look at how much energy each person wastes, Car Driving, CO2 intensive Goods, Heating Temperature... The less one wastes the more timeslots and the less false informations and spam one gets on the mainframe-avatar. When my computer Room is not in use it's switched of by a physical switch.

To Save The Planet. Thanks to Greta for telling us older people that we MUST ACT NOW.
