Pottery Crafts — m3

Guiltless been thrown out of the University, then they put MarcJr in a Pottery course, which was sold as a "good" lesson to correct his (non-existent) arrogance, de facto it was psychological warfare to break(point) Marc Jr with pointless works: "go, do a bit of crafting you looser" = revictimizing of his childhood. 14 years before Snowdens Leaks Marc already found out about the infiltration of Swiss Company Networks, which then was prooven by Snowden in June 2013 irrevocably. TNX Ed. Technically the Network could be secured, but the Network installed also malware and backdoors in the psyche of relevant People like politicians, Shrinks, Computer Scientists, Science People. To fix that too will cause tears, therefor never forget the a15 Card

thrunky the elephant — m4

The trunk of the elefant can be interpreted by other children (that maybe wre abused by pedophile older people) as phallic symbol, so the Rape would be virtually revived again (revictimizing, maybe t1, t15, b1 and other cards involved) and the victim would maybe hate the kid with Elephant Plush much more, then maybe hate the kid with Elephant Plush much more, maybe the initial pedophile offender, depending on the "exposure time" See Clark Hulls Formula for Emotions. Maybe the reason why Stefan K. and Stefan W. threw Marcs Plush-Elephant out of the window from the 3rd floor in a christian camp when Marc jr was about 14 Years old, but no details are known so far about this cases since both don't want to talk with Marc Jr. or it is censored on all communication paths.

Weapon part 2 — m52

With Weapon part 1 card they forced me to open my safe deposit box at UBS Aarau (The Police Officers Name: Michael R. & a Women dont remeber name) They photos from the content of my deposit box, just as a "proof" that there are no weapons in my deposit box. In fact this was footprinting and ennumeration for to steal my data and to create more suicide death bots against me and us. This was granted possibly by prosecuting attorney Marco Spr. of the Justizdepartement Aargau, Switzerland. So now $herFather, $herOnkel, $herMother, $1940sShrink and the whole Canton of Aargau has all my data, and maybe they even used MY diary entry about Michael B. (Grosimörder Aarau) to drive (t* cards) to him run Amok against his Grandmother. I was thinking Michael B. will commit suicide so i meet often with him to deescalate, but i could not when i was in the mentall institution when Michael driven

faith detection — m77

with Neurosky MindWave you can read attenuation or meditation, so we guess one electrode (t1 card) would be sufficient to extrapolate for example also the parameter faith. This card was added after i leaked m57 Card...
There seems to be an algorithm, that records what one is doing for example during a week, saves the good scenes and then tries to create a Suicide Death Bot with this inverted good scenes.

Additionally they seem to drop all connections from the victims t1 to other allies, so no-one could help.

Workaround: Listen to music you love, I use wireless headphones to not disturb my neighbors. I guess the music makes it harder for the detection algorithms to identify your emotions.

APPLE-BAUM — m66

Its all the fault of the >>>applebaum<<< or the fault of the kid, >>but definitly the mothers fault<< There are [Mothers/Vathers] that force their [daughter|sons] to eat from the forbidden tree. There are also Parents that don't feel guilty, so they would not have a reason to force their kids to eat from the forbidden tree. IMHO the NSA/CIA tried to use Jacob Applebaum as jewish scapegoat. The Applebaum would be a symbol for all those people and sinners that killed an innocent equal aged friend (one out of 80) So the CIA has a reason blackmail and dissociate the left over 79 in fact "themselfes" said yes to kill the "rapist terrorist", but in fact the Neuralink just transmitted this approval and stored the scene in NSA/CIA Data Retention. So we question the honesty of the universities where Jake learned and teached. However, people with names like AppleBaum, Apfelbaum, Appletree would be great opportunity for a generic multifunctional scapegoat satans.

Seperating one sheep from the herd — m68

https://0x8.ch/HackersCardgame21

Year: ~????

Inventor: xxxxx

If we use sheep as a metaphor for kids or people, satan tries to separate one speep from the herd, as a hostage to blackmalis the other sheeps (ma4) or if this does not work they use the next dirthy trick and say the "black" sheep is eg. a "Rapist Terrorist" (m41 card), then they would even kill the "black" sheep (m46), eat it's goods and then blackmail the other sheeps with the dt1 card, telling them that it's their fault because they helped separate the victim. If they can make the other sheeps agree in judging the "black" sheep with m37 card the group would feel guilty (even when they not killed it) so they normally would declare a new "black" sheep that told the other to separate the victim, and the dirthy game would go on an on on this way. The Term Sheeple even makes the victim think that he / she is better than others that could stay in the group...

nightly erase of relevant information(s) ([global] loop on Neuralink) — m116

Inventor: xxxxx

IMHO there is a nightly (maybe global [generic| personalized]) algorithm, that deletes relevant information(s) like sentences [1] from @ioerror from the mind of people or at least from my mind. Prerequisites would be lots of data about a persons live, something like Stimoceiver / Neuralink / US4877027 and specific algorithm that would eg. show an image / stimulus on Neuralink for the scene they would like to delete and causing pain at the same time eg. with b1 Card... If true and one could record what they try to delete we would maybe then know how more how they manipulate the world. Yet another Nash Equilibrium... [1] Basically the NSA (MarcJr: AND CIA), they want to be able to spy on you (MarcJr: bidirectional), and if they have 10 different options for spying on you that you know about, they have 13 ways of doing it and they do all 13. (MarcJr: at the same time)
